ETIHAD AIRWAYS ENGINEERING HAS EXPANDED PAINTING FACILITIES

News / Maintenance / Trainings

Etihad Airways Engineering has converted Hangar 5 at Abu Dhabi International Airport into a paint hangar, **expanding** its **painting** capabilities.

The Middle East's leading aviation maintenance, repair and overhaul provider, Etihad Airways Engineering has converted the hangar with chillers, improved thermal insulation, and a drainage system to suit painting requirements.

"We have significantly increased our aircraft painting capacity with the introduction of a new paint hangar as we continue to expand our MRO capability on new aircraft platforms," explained Jeff Wilkinson, senior vice president technical, Etihad Airways.
