VISTARA WELCOMES SEVENTH AIRBUS A-320 IN ITS EXISTING FLEET OF SIX AIRCRAFT

News / Airlines

Having successfully transformed the flying experience in India with its existing fleet of six aircraft, Vistara took delivery of its seventh Airbus **A-320** today. The steady and measured fleet expansion plan underlines Vistara's commitment to domestic market as in a short span the airline has grown its fleet to seven taking the count to nine by December 2015. The new aircraft will enable Vistara to extend its world class travel experience to the airline's progressively widening customer base.

Having flown its maiden flight on January 9, 2015, **Vistara** has been successfully catering to the domestic passenger traffic in India for over eight months. In this timeframe, Vistara has flown more than 600,000 happy customers and has rapidly expanded its services with 293 weekly frequencies across 12 destinations in India, including Delhi, Mumbai, Bengaluru, Hyderabad, Pune, Ahmedabad, Lucknow, Goa, Guwahati, Bagdogra, Bhubaneswar (w.e.f Oct 1, 2015) and Varanasi (w.e.f. Oct 21, 2015). Building a strong growth path on the pillars of service and operational

excellence, Vistara has carved a niche for itself among the discerning travellers.

Delighted to welcome the newest aircraft, Mr. Phee Teik Yeoh, CEO, Vistara said, “We are elated to announce the addition of the seventh aircraft to our current fleet. We have received an overwhelming response from our customers who are asking for more choices of destinations and increased frequencies. It is, therefore, imperative for us to constantly expand, innovate and improvise to continue to provide a personalised and seamless travel experience to them. With our commitment to serve the domestic market we will add two more aircraft to our fleet that will increase our footprint by 50% in the next three months. ”

Like all its previous aircraft, the latest addition has also been manufactured at the Airbus manufacturing plant in Toulouse and leased from BOC Aviation. The technical prowess, proven quality and reliability of Airbus has met Vistara’s stringent standards for safety, cabin comfort, fuel efficiency and overall operational excellence. The new aircraft too comes with advanced technologies that include extensive use of weight-saving composites and a centralized fault display unit which makes troubleshooting faster and easier. The Sharklets – large wingtip devices – reduce fuel burn by 4% and increases payload-range performance by 100nm which corresponds to an annual reduction in CO2 emissions by around 900 tonnes per aircraft.
