GAMA AVIATION ADDS A LEARJET 75 TO ITS FLEET

News / Business aviation

Gama Aviation has taken on the management of its first **Learjet 75**, having overseen the delivery of the new aircraft from Bombardier.

The aircraft has been added to the Gama Aviation fleet on behalf of one of the company's US customers and is expected to be based in Central America.

The new model joins the Learjet 45, 45XR and 60 aircraft, as well as aircraft from Bombardier's Challenger and Global series, which Gama Aviation already operate for their clients across the US, Europe and China.

In total, Gama Aviation's worldwide fleet now includes more than 30 different aircraft types.

> "As a business we pride ourselves on being able to offer our customers expert support across a wide range of aircraft types and we're delighted to add the Learjet 75 to our stable."

KC Ihlefeld, VP Aircraft Management of Gama Aviation said**:** “As a business we pride ourselves on being able to offer our customers expert support across a wide range of aircraft types and we’re delighted to add the Learjet 75 to our stable. We have hands on experience with aircraft from all the major OEMs and this enables us to provide clients with a consistent level of service, no matter what the aircraft type or their mission requirements.”

“It is a resounding endorsement of the relationship we aim to build with clients that when customers want to change or add additional aircraft they seek our help in arranging the transition and delivery and continue to trust us with their management. It is these long standing relationships that are the best indication of the service we provide,” added Ihlefeld.
