TEXTRON AVIATION EXPANDS SERVICE OFFERINGS TO INCLUDE CESSNA CITATION 560XL SERIES LANDING GEAR REPAIR PROCESS

News / Business aviation, Maintenance / Trainings, Manufacturer

Textron Aviation expands its service offerings to include a new standard repair process for Cessna Citation 560XL series aircraft main landing gear (MLG). The new solution, developed in collaboration with the company' affiliate, Able Aerospace Services, allows for significant MLG repairs without a full replacement – providing an additional timely and cost-effective part option for customers.

Brian Rohloff, senior vice president, Customer Support commented: "Our priority is delivering the best aviation experience for our customers, and having the option to repair main landing gear gives customers additional flexibility when servicing their aircraft. This investment in a new solution for Citation 560XL aircraft supports reducing operating costs and minimizing aircraft downtime so that we can keep our customers moving."

MLG repair capabilities on Cessna Citation CJ series were initially announced back in 2020. In addition to offering greater efficiency for customers, the new service supports Textron Aviation's
