

ACI JET RENEWS IS-BAO STAGE 3 GLOBAL SAFETY STANDARD

News / Business aviation

ACI Jet successfully completed an IS-BAO Stage 3 renewal audit of its flight operations. IS-BAO Stage 3 is the highest safety standard registration level and verifies that safety management activities are fully integrated into the operator's business and that a positive safety culture is being sustained. ACI Jet operates 18 business jets and has been registered as an IS-BAO operator since 2012. ACI's goal in implementing IS-BAO has been to build a culture that continuously strives for a better, safer way of operating by identifying areas where better risk management will improve safety. Conformity to the best practices of IS-BAO raises the confidence of operations personnel, customers, and insurance carriers and demonstrates ACI Jet's commitment to operational excellence.

Independent accredited IS-BAO Auditors Bill McBride and Jim Bennett commented: “ACI represents an outstanding example of teamwork, training, cultural development, and an excellent continuous improvement process. Congratulations to the ACI team; we enjoyed working with you and admire your pursuit of operational excellence.”

Andrew Karas, IS-BAO Programme Director, said: “The ACI Jet team should be proud and honored with this achievement and we commend them for their journey to safety excellence and continuous improvement. Congratulations, and thank you for your voluntary commitment to IS-BAO for over a decade!”
