

FUEL SYSTEM EXPANSION LEADS TO RECORD PERFORMANCE AT GA TELESIS COMPONENT REPAIR GROUP

News / Maintenance / Trainings

GA Telesis announced record-breaking results from its expansion into the fuel system at its MRO Services Component Repair Group. Initiated in 2021 to meet customer demands, this venture into fuel products has consistently delivered outstanding outcomes, with revenue for this segment doubling annually. This year's first quarter stands as the Company's most successful ever, with the fuel product line playing a pivotal role in this achievement.

During the first quarter of 2024, MRO Services team completed the expansion of the fuel systems facility's footprint and integrated new test benches, thus broadening the range of part numbers the Company can service for its existing clientele. Additionally, in 2023, the Company diversified its services to encompass fuel pump overhaul for an OEM specializing in engine overhaul services for major US carriers.

Pastor Lopez, President of MRO Services Group highlighted the significance of these expansions into the GA Telesis Ecosystem :“The additional footprint and capabilities enable us to enhance our market penetration by offering our existing customers a broader range of products, all while

maintaining our commitment to excellent customer service.” He further emphasized the strength of their team of fuel technicians, led by a seasoned industry expert in the field.

Company' technical expertise and real-time customer service are key differentiators for MRO Services group. Further, MRO Services group focuses on performance by deploying lean operations and eliminating waste from daily activities that lead to direct cost savings for our customers. The “OEM Parts Only Philosophy” and the company’s multiple OEM material service agreements benefit GA Telesis' customers and its OEM partners. MRO Services plans to continue its OEM alignment strategy with other OEMs that will allow it to provide OEM-approved repairs while using genuine OEM-approved materials at competitive rates.
