

LUFTHANSA TECHNIK TO PROVIDE COMPONENT SUPPORT FOR MASAIR

News / Maintenance / Trainings

Five years of Total Component Support for MasAir's Boeing 767F fleet. Lufthansa Technik and the Mexican carrier MasAir Cargo Airline have signed a comprehensive Total Component Support contract covering repair and overhaul of components for MasAir's Boeing 767F fleet. The new contract governs supply for up to 14 aircraft over a period of five years. This is the first contract signed directly between Lufthansa Technik and MasAir.

Gustavo Acevedo, Director of Maintenance, MasAir, said: "With Lufthansa Technik we are confident to have secured the support of a global player in technical aircraft services whose experience and reliability we highly value. This is especially important now that we have started our ambitious fleet expansion plan."

"This contract is a big success for Lufthansa Technik in the highly competitive Mexican market. As a strong partner, we are looking forward to supporting MasAir during the successful expansion of its business," said Robin Johansson, Senior Director Corporate Sales Latin America and The Caribbean, Lufthansa Technik.

With the Total Component Support agreement, MasAir benefits from an individual supply concept that enables short, rapid transport paths. Component support of MasAir fleet will be ensured through a home base stock to be established in Mexico City and in Los Angeles, California.
