

AIR ASTANA FINALIZES ORDER FOR UP TO 15 BOEING 787 DREAMLINER JETS

News / Airlines, Manufacturer

Air Astana has finalized an order for up to 15 787 Dreamliner jets to grow and modernize its Boeing widebody fleet. The agreement for additional 787-9 airplanes will enable Air Astana to expand its operations and enhance its passengers' experience. The order, previously announced as a commitment in November 2025, represents Air Astana's largest single airplane purchase. With three more 787-9 airplanes to be delivered via lessors, Air Astana's 787 fleet will grow up to 18 787-9 airplanes to fuel its long-haul capabilities.

Peter Foster, CEO of Air Astana commented: "Air Astana is strategically committed to boosting its service capabilities from Central Asia / Caucasus to Asia, Europe and the rest of the world over the next decade, with the arrival of the first Boeing 787-9 Dreamliner next year marking the start of this exciting phase of development. With its customer friendly cabin, fuel efficiency and range flexibility, the fleet of up to 18 Boeing 787-9 aircraft is destined to become an outstanding success with the airline and its discerning passengers."

Paul Righi, vice president of Boeing Commercial Sales for Eurasia and India stated: "Boeing airplanes have been integral to Air Astana's operations from the beginning and we're proud the 787 Dreamliner will support Central Asia's growing importance in aviation. Air Astana's decision to expand its fleet with the 787-9 aligns with its vision to boost operational capabilities and efficiency while elevating its service offerings."

Air Astana currently operates three Boeing 767 widebody jets across a network that connects Kazakhstan with destinations in Europe, Asia and the Middle East. The airline will leverage the ultra-efficient 787-9, which will seat 303 passengers, to grow capacity across its existing routes and enable expansion into North America.
