

DECLARATION OF TOULOUSE ON FUTURE SUSTAINABILITY AND DECARBONIZATION - AIRBUS, AIR FRANCE-KLM, ATR, DASSAULT AVIATION, GROUPE ADP, SAFRAN AND THALES

News / Manufacturer

This landmark Declaration, Europe becomes the first region worldwide to have reached an agreement between public authorities and private stakeholders on a broad aviation decarbonisation platform.

European industry leaders Airbus, Air France-KLM, ATR, Dassault Aviation, Groupe ADP, Safran and Thales welcome the declaration made in Toulouse by the European Commission and Member States under the French EU Presidency. Together:

- We welcome the commitments of the European Commission and Member States to work with the European aviation industry to achieve the decarbonisation of the sector by 2050 in alignment with the Destination 2050 roadmap.
- We will continue to invest in the maturation, development and implementation of decarbonisation technologies - notably operations, next-generation aircraft and engines, Sustainable Aviation Fuels (SAF) and synthetic fuels - and look to institutions to support the development and deployment of innovations, especially through proven public-private research partnership instruments (such as Clean Aviation, SESAR, and CORAC), as well as appropriate support policies to accelerate fleet renewal and SAF incorporation under viable economic conditions for all stakeholders.
- We urge the European Commission to implement the launch of industrial alliances that will be critical to align the entire ecosystem around this joint ambition, particularly the Renewable and Low-Carbon Fuels Value Chain Industrial Alliance, the Alliance for Zero Emission Aviation and the European Raw Materials Alliance.
- We also welcome the call for all partners worldwide to work together towards the adoption at the 41st ICAO Assembly of an ambitious long-term aspirational goal (LTAG) for international aviation.
- We call for the commitments taken by the European Union to be adopted globally to accelerate the decarbonisation of our industry. In the meantime, we urge the European Union to implement mechanisms to ensure a level playing field and to avoid any carbon leakage linked to distortion of competition among stakeholders within the global aviation ecosystem.
