

DEUTSCHE AIRCRAFT SIGNS LOI FOR UP TO FOUR BRAND-NEW D328ECO AIRCRAFT WITH UNDISCLOSED CUSTOMER

News / Manufacturer

Deutsche Aircraft signed a Lol with an undisclosed customer for the purchase of up to four state-of-the-art D328eco aircraft, which will replace an ageing turboprop fleet. This agreement marks a significant milestone for Deutsche Aircraft as it solidifies the company's position in the sub-50-seater category and serves as a testament to the global demand for new regional aircraft.

The technologically advanced D328eco offers exceptional performance capabilities, making it the first choice for regional operators in the turboprop segment who are looking to replace an ageing fleet of regional jets and turboprops. Its ability to operate in challenging weather and infrastructure conditions, including extreme heat and sub-zero temperatures, sets it apart from other aircraft in its class. In addition, the D328eco's short take-off and landing capacity (STOL), outstanding economics and significant CO2 reduction contribute to its appeal.

Anastasija Visnakova, Vice President of Sales and Marketing at Deutsche Aircraft, commented: “The aircraft's ability to operate in challenging environments – including short, unpaved runways and remote destinations – makes it a reliable, capable and efficient solution for regional operators. On top of that, the D328eco offers the best economic and environmental advantage in its class. We recognise that regional connectivity is an important lifeline for many communities around the globe and Deutsche Aircraft is honoured to support this mission and contribute to regional operations.”

Deutsche Aircraft maintains its commitment to providing regional connectivity in the most efficient, cost-effective and sustainable way possible. The company's dedication to innovation and customer satisfaction has cemented its position as a reliable partner in the aviation industry.
